

ANNOUNCING

The Journal of Rare Disorders

A peer-reviewed, clinically oriented series covering the latest advances in rare disorders

Co-Editors

M. Ian Phillips, PhD, DSc, FAHA
Norris Professor of Life Sciences and
Director of the Center for Rare Disease Therapies
Faculty Director, PreMed Program
Keck Graduate Institute
Claremont, CA

Tim Coté, MD, MPH
Former Director of the Office of Orphan Product Development, FDA
Professor of Regulatory Practice
Keck Graduate Institute
Claremont, CA

The Journal Offers:

- Timely Peer-Review
- Publication Quarterly
- Open Access To All Articles Online
- Expert Editorial Assistance
- Reprints Available Shortly After Publication

Rare Diseases affect 25 million patients in the United States and until now there was no single journal dedicated to the discussion of these disorders.

The Journal of Rare Disorders is a quarterly, open access, online journal that provides a forum for original research, open-label studies, regulatory issues, review articles, case reports and editorials on all aspects of diagnosis and treatment of rare diseases.

Dear Colleagues:

We wanted to take a moment to make you aware of a new forum for the exchange of information on the important subject of rare disorders. Until now there was no single U.S. journal dedicated to this topic. The Journal of Rare Disorders is a quarterly, open access, online journal that provides a forum for original research, open-label studies, review articles, regulatory issues, case reports and editorials on all aspects of diagnosis and treatment of rare diseases.

The journal will be co-edited by Keck Graduate Institute faculty M. Ian Phillips and Timothy R. Coté. Dr. Phillips is the Norris Professor of Life Sciences and the director of the Center for Rare Disease Therapies. Dr. Coté is the former Director of the Office of Orphan Product Development at the FDA and currently holds the position of Professor of Regulatory Practice at the Keck Graduate Institute.

This peer-reviewed publication will focus exclusively on cutting edge topics in rare disorders and is meant to increase the body of knowledge in this field.

We are committed to making this new journal valuable to the rare disease community including: physicians, researchers, regulators, patient advocacy groups and pharmaceutical companies involved in developing orphan therapies.

We are now accepting submission of original manuscripts on all aspects of rare disorders and encourage inquiries at the following:
